The Company

Project management

FEG has many years of combined experience and expertise in both project engineering and project management, FEG can really help clients in the food industry to deliver a wide variety of projects to time, cost and quality.

- Site based Project Managers
- Project Specific Management Team
- Site Supervisors
- CDM Duty Holders
- Feasibility Studies & Drawing Layout
- CDM Coordinator Services
- PUWER & CE Marking

Air pollution control & ventilation

FEG specialise in solving air pollution control and ventilation problems that others find too difficult. We offer a range of solutions from consultancy and design to full turnkey packages. We are not tied to any particular supplier or manufacturer therefore we can offer a solution or design that best suits the application rather than be limited to a product range.

- LEV (Local Exhaust Ventilation) Surveys
- Dust in Air Surveys
- Noise Surveys
- Worker Comfort Surveys
- Ventilation & Air Conditioning
- Extraction Hoods
- Heat Stratification
- Modification of Existing Dust Filters
- New Dust Extraction Systems
- Odour Abatement Technology
- Gas Scrubbing
- Ductwork Modifications & Systems
- Heat Wheels & Absorption Technology
- Condition Surveys

Sustainability

Sustainability is essential in today's society, with a real desire on the part of clients to demonstrate corporate social responsibility, ensure cost efficiencies across their organisations and feed into the needs of their supply chains.

FEG understand that the viability of a technology or product is dependent upon a client's operating parameters and demands therefore suitability will change accordingly from site to site.

- Heliex Waste Heat To Energy
- Waste to Energy Systems (Biomass & Anaerobic Digestion)
- Heat Recovery Systems
- Energy Efficiency and Reduction
- Process Design
- Heat Wheels & Absorption Technology
- Rankine Cycle
- Heat Stratification
